Karviná:
23th February 2007

Results of the laboratory analysis:

On 29th January 2007 we received undermentioned sample of the no. of dose and shelf life

Galaxy Müsli bars with jogurt glaze with apricot flavour
(LOT:061013; 13.4.2008)

The sample no. 1309 underwent microbiological and chemical analysis according to your requirements. The copies of the laboratory protocols are attached.

Conclusion:

On the base of the laboratory analysis it was found out that in the chemical respect the sample complies with the requirements of Regulation of the Ministry of Health No. 304/2004 Coll. as amended, by which sorts and conditions of the use of accessorial and auxiliary matters (synthetic dye) at the production of foodstuff are stated.

Metals content and microbiological indicators comply with the requirements of In – house specifications no. 01/2007 of firm Aminostar s.r.o.. Quality parameters were not evaluated.

The conclusion of the laboratory analysis can be applied for the other products of the the same sort only in case the products comply with the tested sample as for the composition and characteristics.

TEST REPORT No. : 1257/2007 /KA

Customer : AminoStar, s. r. o.
Ohrazenice 188
511 01 Turnov

Batch No. : 411
Order No. : D47/2007/4213
Ref. No. :
Sample Received : 29.1.2007
Sample Analyzed : 29.1.2007 - 23.2.2007

Sample No. :	1309	Sampling date :	25.1.2007	Sampling time :	not mentioned
Sample :	Galaxy Müsli bars with jogurt glaze with apricot flavour				
Batch No. :	LOT:061013				
Sampling site :	AminoStar, s. r. o., Ohrazenice 188, Turnov				
Sample Type :	Foodstuff				
Sampled by :	Szurmanová				
Mode of sampling :	original package				
Purpose :	analysis				
Volume :	30 g				
Expiry date :	13.4.2008				
Notice :	Importer: AminoStar, s. r. o., Ohrazenice 188, Turnov				

Results - chemical analysis

(Method in column Type : "A" accredited, "N" not accredited, "SA,SN" subdeliveries accredited/not accredited, "FA1" flexible accredited type 1, "FA2" flexible accredited type 2)

Parameter	Value	Unit	Type	Method used	Uncertainty
As	<0,05	mg/kg	A	SOP 108	-
Cd	<0,02	mg/kg	A	SOP 108	-
Hg	0,001	mg/kg	A	SOP 108	10%
Na	33	mg/100g	A	SOP 108	10%
Pb	<0,2	mg/kg	A	SOP 108	-

Results - microbiological analysis

(Method in column Type : "A" accredited, "N" not accredited, "SA,SN" subdeliveries accredited/not accredited) "FA1" flexible accredited type 1)

Parameter	Value	Unit	Type	Method used	Uncertainty
Total Aerobic Mesophilic Count	$7,5 \times 10^3$	CFU/g (ml)	A	SOP 329	$6,4 \times 10^3 - 8,7 \times 10^3$
Coagulase-positive staphylococci	$< 5 \times 10^1$	CFU/g (ml)	A	SOP 331	-
Escherichia coli	$< 1 \times 10^1$	CFU/g (ml)	A	SOP 302	-
Yeasts	$2,2 \times 10^3$	CFU/g (ml)	A	SOP 332	$2,0 \times 10^3 - 2,4 \times 10^3$
Moulds	1×10^1	CFU/g (ml)	A	SOP 332	$< 1 \times 10^1 - 3 \times 10^1$
Salmonella	negative	10g	A	SOP 335	-

Notice to sampling : The sampling itself is not a subject of accreditation.

Results deal with tested samples only.

This Report can be reproduced only complete, its part only with the written permission of this testing laboratory.

Results relate to the object of testing and do not replace other documents.

These expanded uncertainties of measurement are obtained by multiplying of standard uncertainty of measurement by extending coefficient $k=2$ (for confidence level 95%). Uncertainty of sampling not included.

For microbiological parameters, uncertainties of measurement are obtained at the 95% confidence limit according to Poisson distribution. Uncertainty of sampling not included.

The laboratory has a flexible scope of accreditation. The laboratory may use standardized or technically equivalent and modified methods of testing in the case that the principle of measurement is kept.
