**Results of the laboratory analysis.**

On 1<sup>st</sup> February 2007 we received undermentioned product of the no. of dose and shelf life

**Nitric Oxide ( LOT: 060526; 26.5.2008)**

The sample no. 1611 underwent microbiological and chemical analysis according to your requirements. The copies of the laboratory protocols are attached.

**Conclusion:**

On the base of the laboratory analysis it was found out that in the chemical respect the sample complies with the requirements of Regulation of the Ministry of Health No. 304/2004 Coll. as amended, by which sorts and conditions of the use of accessorial and auxiliary matters (synthetic dye) at the production of foodstuff are stated.

Metals content and microbiological indicators comply with the requirements of In – house specifications no. 01/2007 of firm Aminostar s.r.o..Quality parameters were not evaluated.

The conclusion of the laboratory analysis can be applied for the other products of the the same sort only in case the products comply with the tested sample as for the composition and characteristics.

Notice to sampling : The sampling itself is not a subject of accreditation.

Results deal with tested samples only.

This Report can be reproduced only complete, its part only with the written permission of this testing laboratory.

Results relate to the object of testing and do not replace other documents.

These expanded uncertainties of measurement are obtained by multiplying of standard uncertainty of measurement by extending coefficient  $k=2$  (for confidence level 95%). Uncertainty of sampling not included.

For microbiological parameters, uncertainties of measurement are obtained at the 95% confidence limit according to Poisson distribution. Uncertainty of sampling not included.

The laboratory has a flexible scope of accreditation. The laboratory may use standardized or technically equivalent and modified methods of testing in the case that the principle of measurement is kept.
